AIRAVAT

CLOUDFRONTS

Airavat Imports worked with CloudFronts to carry out Email Migration and Office 365 deployment for increasing operational efficiency.

About Airavat Imports:

Established in the year 1987 in Mumbai, Airavat Imports is the leading distributor, dealer and exporter of auto spare parts across 15 countries. They represent several leading vendor companies and OEM suppliers in the auto spares market. You can read more about Airavat Imports at www.airavatautospares.com/.

Business Requirement & Challenges:

Airavat Imports approached CloudFronts with the following challenges –

1. All their business documents were stored locally on network drives and this was prone to the data leakage or any accidental deletions. Further, there was an absence of any backup solution!
2. Their emails were hosted on different email platforms and they lacked a single platform for all their business solutions.

Key Technologies:

➢ Office 365
➢ SharePoint Online
➢ Exchange Online

Solution Delivered:

CloudFronts team introduced Airavat Imports with Office 365 Subscription plans and guided them to select a suitable one according to their needs. With such a wide range of applications, Office 365 gives organizations an easy way to standardize business tools.

Firstly, all the emails of the users were migrated to Office 365. Post that, all the services and applications were deployed on the system.

A company intranet was created for document management with the help of SharePoint Online to store all the business documents which were previously on network drives. This not only stored documents but also 'secured' them as well.

None of the platforms work well without appropriate end-user training. Therefore, training was conducted demonstrating the use of Office 365 applications and services like MS Teams, OneDrive, Exchange Online. This also included insights into the ways to access the documents in SharePoint Online.

Post Go Live:

Post-Go-live, Airavat Imports team is now using Office 365 services and applications with great features and performance but most importantly, now they are on a fully integrated single platform resulting in more efficient internal communication.
